

THE CLICK & GO™ SYSTEM EXPLAINED

What is the CLICK & GO System?

The Britax CLICK & GO™ System is comprised of two interlocking pieces that create a secure attachment between a Britax, BOB or selected Steelcraft Strollers and a Britax Safe-n-Sound Unity Infant Carrier with the required accessories*. The CLICK & GO™ Receiver (sold separately) is installed on the Stroller and the Infant Carrier is equipped (or can be brought separately) with the adaptor that inserts into the stroller receiver. These interlocking pieces provide a quick, secure and safe attachment between an Infant Carrier and a Stroller.

*The CLICK & GO™ receiver is part of the Car Seat Adapter accessory for BOB Strollers.

What are the Benefits of the CLICK & GO™ System?

The Britax CLICK & GO™ System is designed to create Infant Carrier compatibility and Stroller versatility. The CLICK & GO™ feature makes life easier by enabling the Britax Safe-n-Sound Unity to simply “click” into exclusive Britax, BOB and selected Steelcraft Strollers and create more convenient Travel Systems.
